# OPTIMIZING CRITICAL INFRASTRUCTURES

With a history stretching back decades, the foundations of the Camlin business are built on a core belief that innovation is key to driving improvements in the energy industry. We have been at the forefront of key innovations that have changed the face of the industry – including digital fault recorders; digital circuit breaker analyzers; advanced protection systems and network automation technologies. Camlin continues this track record of innovation, developing innovative and intelligent monitoring products and services that help make electricity and rail networks safer, more efficient, resilient, and sustainable.

Key products and services include:

Holistic Asset Monitoring

Transformer, circuit breakers and rotating machines

Digital Solutions

Advanced analytics providing prescriptive actions on asset health

Asset Condition Assessment

Building a full picture of asset health

Expert Services

Focused seminars and training aimed at driving knowledge sharing

We believe in leveraging our partners existing platforms and technology, partnering this with new developments to provide expert analysis into asset condition, translating diagnostic data into prescriptive actions. With headquarters in the UK, the US and China, and facilities in 21 cities across 17 countries, we are set up to deliver globally, ultimately our goal is to ensure our customers see real value from monitoring technology.

WE WANT TO ENSURE OUR CUSTOMERS SEE REAL VALUE FROM MONITORING TECHNOLOGY.

OVER 80% OF TRANSFORMER  
FAILURES CAN BE ATTRIBUTED  
TO THREE KEY AREAS;  
WINDINGS, BUSHINGS  
AND ONLINE TAP CHANGER<sub>(OLTC)</sub>

## A HOLISTIC MONITORING APPROACH

---

### The Challenge for Asset Managers

When it comes to critical assets, power transformers are at the top of the list - and when they fail prematurely, it's all the more painful. Damages can far exceed the cost of damage to the transformer.

#### Key challenges for asset managers include;

- Managing multiple transformer assets
- Gathering relevant health data to make informed decisions
- Cutting through the noise to see critical data
- Trusting the data from transformer monitoring
- Building a transformer monitoring strategy that is sustainable

### The Solution

TOTUS monitors all key components on the transformer, giving a full picture of transformer health and is the only unit to integrate DGA, Partial Discharge (PD), Bushing Monitoring (BM), Through Fault Currents (TFC) and Transformer Analytics into a single system.

### The Result

A comprehensive, granular picture of power transformer health that allows asset managers to optimize maintenance strategies resulting in;

- Significantly reduced risk of sudden transformer failure and associated costs
- Enhanced predictive maintenance to extend life of the transformer
- Uninterrupted power supply, reducing unplanned outage

# TOTUS

## MONITORING CAPABILITIES

✓ Bushings

Partial Discharges

Dedicated trend for Partial Discharges in bushings  
Arcing events

Leakage Current

Currents amplitude and phase  
Current polar plot

C1/PF

Tandelta/PF variations  
C1 and C2 variations

Others

Temperature  
Load  
Humidity

✓ Tap Changer

Temperatures

Main Tank Temperature  
OLTC Temperature  
Differential Temperature

Motor

Current  
Voltage  
Torque

DGA

7 Gas  
Moisture in Oil

Others

Tap Position  
Oil Level  
Load  
Status / Alarms

✓ Main Tank

DGA

9 Gas  
5 Gas  
Moisture in Oil

Partial Discharges

Active PD's  
Arcing events

Through Faults

Event Count  
Cumulative Effect

Cooling Sytem

Pump / Fan Absorption  
Cooling Status  
Temperatures

Models

Hot Spots  
Aging / Remaining Life  
Moisture in Paper

Bubbling  
Dynamic Loading  
Oil Breakdown Voltage

Others

Geomagnetic Induced Currents (GIC)  
Direct winding temperatures with fiber optics  
Analog and Digital Inputs  
Integration of any third party monitor/system

# TECHNOLOGY SPOTLIGHTS

## Dissolved Gas Analysis

Providing a DGA profile of 5 or 9 gases, TOTUS delivers cost-efficient condition-based maintenance with best-in-market accuracy without the need for any carrier gas consumable. Featuring an embedded and advanced alarm management, our dependable solutions enable more efficient maintenance scheduling for Asset Managers, with alerts only triggered when there is an issue with the transformer.

## Partial Discharges

Early detection of PD can significantly improve risk diagnosis, driving quicker accurate decision making. With no need for expert interpretation, our user-friendly interface uses the innovative ‘PD Triangle’ for a quick and easy understanding of data. This data can be graphed and correlated to other parameters such as temperature, humidity, load and DGA.

## Through Fault Current

One of the largest causes of transformer faults is due to external events such as through faults. Understanding which transformer is impacted in the fleet, plus visibility of the integrity of the paper insulation can help assess the mechanical strength of the transformer and the risk for mechanical damages. TOTUS monitors the electrodynamic stress caused by through faults and cellulose aging due to the combined action of temperature, moisture, and oxygen.

## Bushing Monitoring

Online monitoring of bushings, through monitoring of internal insulation (capacitance/tan delta or power factor) and the internal electrical activity (partial discharges/arcing) enables Asset Managers to detect a fault in its inception. This allows an action to be taken before reaching a critical and irreversible condition. TOTUS monitors the following parameters in bushings: Partial Discharges, High Energy Events, Leakage Current Angles and Magnitude, Temperature, Load, Bushing Properties.

## Arcing Events

Acetylene is the primary marker of a high-energy event. Whereas other monitors can provide basic information identifying acetylene in the transformer, TOTUS delves deeper into arcing activities. This helps identify the phase and winding, as well as visibility on the number of arcing events. The key benefit is the ability to correlate data and generate a deeper understanding of the developing fault.

## Transformer Analytics

The TOTUS Transformer Analytics module provides reliable diagnostic and prognostic guidance on transformers based on IEEE and IEC loading guides. By combining data from sensors, nameplate details and factory test results, TOTUS can run thermal models to estimate transformer remaining life as well as assess overloading capabilities. A specific moisture-package provides bubbling temperature, online breakdown voltage and moisture in paper estimation by using the moisture in oil data.

KEY BENEFITS

Modular

Can be equipped with Partial Discharge (PD), Bushing Monitoring (BM) and Through Fault Current (TFC) to give a comprehensive picture of transformer health.

Decision Making

Embedded web server enables asset managers to detect, diagnose, and react quickly to failure risks.

Usability

Intuitive user interface for commissioning, without requirement for external software.

Bespoke Services

Access to a range of Camlin Services from product training and seminars, condition assessment and dedicated project manager for installation, commissioning and aftercare.

Modular Software

Access to TOTUSPRO Software Suite, which is modular based on your requirements. We provide a clear picture of asset health and fleet health depending on asset strategy.

Planning

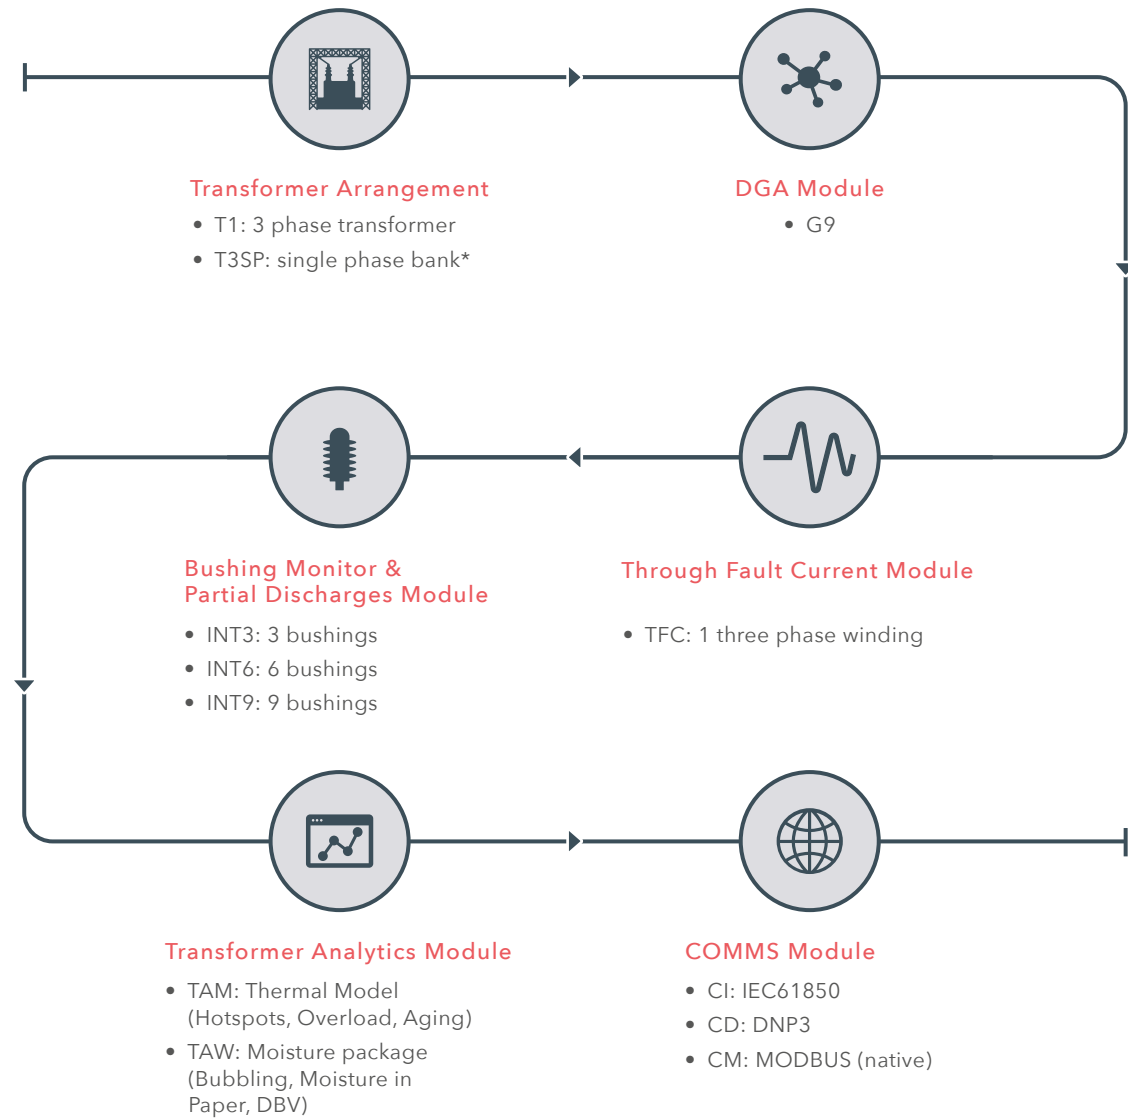

Early detection of risks facilitating planned maintenance.

TOTUS PROVIDES A CLEAR PICTURE OF TRANSFORMER HEALTH, REDUCING THE RISK OF UNPLANNED OUTAGES, ENHANCING MAINTENANCE STRATEGIES AND MAXIMIZING OPERATIONAL EFFICIENCY.

## BUILD YOUR SYSTEM

The flexible and modular design of TOTUS allows you to configure your system based on your assets. Here is an outline of key configuration options available.

\*for this configuration contact sales

**Customer Installation:**  
T1-G5-INT3-TFC+Models: TOTUS with DGA 5 Gas, PD and Bushing Monitoring on 3 bushings with Transformer Models

### Configuration examples: Adaptable to your requirements

T1-G9	TOTUS with DGA 9 gas module
T1-G9-INT9	TOTUS with DGA 9 gas and PD and Bushing Monitoring on 9 bushings
T1-G5-TFC -TAW	TOTUS with 5 gas, through fault currents and moisture analytics package

# TOTUSPRO SOFTWARE SUITE

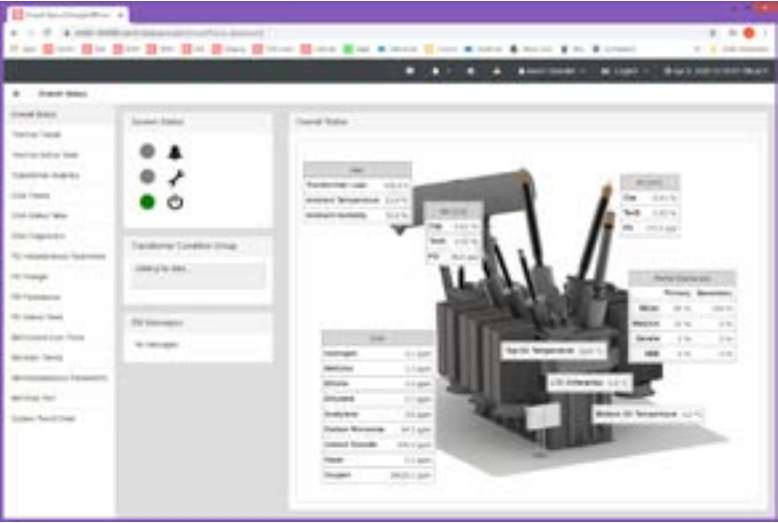

## Embedded web server

Each TOTUS device comes embedded with TOTUSPRO Web, Camlin Energy's online server which incorporates advanced diagnostics, providing a graphical and easy to read display of information.

## Modular approach to software

Customers have the option to expand software options depending on maintenance strategies, the TOTUSPRO Desktop is an additional expert tool with the ability to import offline data for deeper investigation into failure modes, while TOTUSPRO Access provides asset managers with a full fleet view.

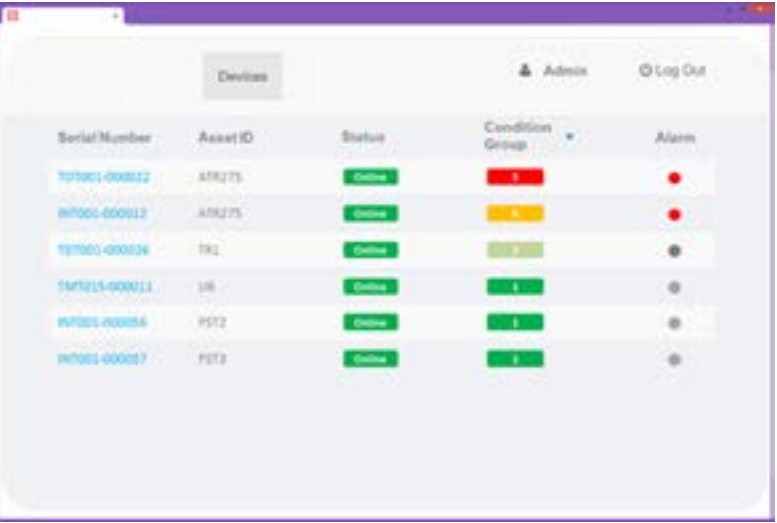

Our software suite of products consolidates data from our hardware devices to provide a clear picture of asset health and fleet health, reducing unplanned shutdowns, boosting production and increasing operational efficiency.

## VALUE BEYOND THE BOX

### Camlin Services

We understand the increasing challenges facing the global power industry. Aging assets are being driven to work harder while asset managers are constrained by limited resources and reduced budgets. Our comprehensive range of services enables customers to generate real value from their monitoring technology.

### Expert Services

Our team of in-house experts are backed by decades of experience in transformer technology. Our range of expert services enables our customers to tap into this wealth of knowledge via 3 key areas;

- Product training
- Expert support
- Academic seminars

### Condition Assessment

While other monitoring systems can provide data trending and alarm notifications, TOTUS is unique in its ability to visually show transformer condition at a glance. Condition assessment service includes;

- Asset Reporting
- Acceptance Tests
- Online Tests

### Field Services & Customer Delivery

Camlin plays a vital role from product conception to product installation, and most importantly support and aftercare. We deliver focused services and support programme to our global network of customers including;

- Dedicated Account Manager for installation commissioning & aftercare
- Bespoke Customer Support Portal
- 24/7 support 365 days
